GALLERY

walk

The goal of this **Gallery Walk** is to begin to look past the surface and to start to get to know your classmates. You will do so by spending some time observing each other's **Heart Map** projects.

In an orderly fashion, when I tell you to begin, you will move around the room, spending two minutes at each project. By the end of the **two minutes**, you will need to have recorded on your paper many of the interesting things that you learned about your classmates.

1. Do **not** write on, destroy, or ruin another student's project.
2. This is an individual assignment; you are **not** working with a partner.
3. There is **no talking** during the Gallery Walk. This will allow you to really think about what you are observing.
