

COVID-19 DAILY PRESCREENING FOR STUDENTS

Prior to sending your child to school, parents must perform a daily symptom check on their child. If the answer is **YES** to any of the following questions, your child **must stay home** from school and you should report your child's illness and symptoms to the school attendance office. You should also follow-up with your child's physician as needed.

- Does your child have a fever (100.4° F or greater) without having taken any fever-reducing medications?
- Does your child have a sore throat?
- Does your child have a new uncontrolled cough that causes difficulty breathing (for children with chronic allergic/asthmatic cough, a change in their cough from baseline)?
- Does your child have diarrhea or vomiting?
- Does your child have new onset of severe headache, especially with a fever?
- Does your child have a recent loss of taste or smell?
- Does your child have congestion/runny nose?

- Within the past 14 days, has your child been in close physical contact (6 feet or closer for at least 15 minutes) with a person who is known to have laboratory-confirmed COVID-19?
- Is your child currently isolating or quarantining because they may have been exposed to a person with COVID-19 or are worried that they may be sick with COVID-19?
- Are you currently waiting on the results of a COVID-19 test for your child?

If your child has one or more of the symptoms above listed they may return to school after **72 hours** (unless they are currently in isolation or quarantine), as long as:

- symptoms have resolved, and
- they are fever free without the use of fever reducing medication, and **either**
- you get a note from your physician stating that your child has an alternative diagnosis, other than COVID-19, **or**
- your child tests negative for COVID-19 (PCR test only; rapid testing not valid)
