The Single Plan for Student Achievement

School: Mission Avenue Open Elementary School

CDS Code: 34-67447-6034730

District: San Juan Unified School District

Principal: Amberlee Townsend-Snider

Revision Date:

The Single Plan for Student Achievement (SPSA) is a plan of actions to raise the academic performance of all students. California Education Code sections 41507, 41572, and 64001 and the federal Elementary and Secondary Education Act (ESEA) require each school to consolidate all school plans for programs funded through the ConApp and ESEA Program Improvement into the SPSA.

For additional information on school programs and how you may become involved locally, please contact the following person:

School Mission

Mission Avenue Open Elementary School's Mission Statement

Guiding the discovery of knowledge Mission Avenue Open School inspires and engages all students to become responsible citizens and creative, confident, critical-thinking problem solvers, through student-centered interdisciplinary learning, enhanced by experiential explorations in respectful collaborations within our community.

School Profile

Mission Avenue Open School is an officially-designated alternative school in the San Juan Unified School District. Of the 530 students attending Mission Avenue Open School 84% are white, 6% are Hispanic/Latino, 4% are African American, 3% Asian/Asian American, and 3% of other ethnicities. 4% of our students are English Language Learners and 18% of our students are socioeconomically disadvantaged.

Mission School is guided by a unified philosophy that provides a high quality, standards-based, and comprehensive elementary school education through experiential learning. This is called the Open Philosophy and is based, in part, on Piaget's developmental learning theory, Dewey's constructivist learning theory, Montessori's use of manipulative materials, and Kohl's thematic, integrated curriculum. In open classrooms, emphasis is placed on individuality and reaching each child's potential. We have found that the best way to provide for this is through the following practices and themes: differentiation of instruction, experiential learning and constructivism, student-centered collaborative classrooms, field education, and parent involvement at all levels of the school program.

We believe applications of technology are critical to teaching and learning at all grade levels. To support this belief we have parent led group called MAST who's primary goal is to raise funds to outfit all classes with iPads, NetBooks, or desktop computers additionally each of our classrooms has an interactive whiteboards. All classrooms are WiFi enabled as we recognize that use of the Internet is one technological key for students success and, as such, plays an important role in hands-on learning, daily practical applications, and 21st century skills which are so important for each student's future.

To support our belief that participation in the visual and fine arts is a critical component in each child's educational program, Mission School offers band and choir programs, as well as multiple opportunities for all children to perform in grade-level and school-wide performances.

Comprehensive Needs Assessment Components

Introduction

During the 2012-13 school year the Mission Ave Open Strategic Planning Team (15 members comprised of 50% teachers and 50% parents and other Stakeholders) met to collaborate and create our Strategic Plan. We conducted much research around data points for student achievement and thinking around the strengths we have at Mission Avenue Open, the challenges we face, factors that impact us, what our ultimate goal is for every child, and how we will accomplish that.

The Planning Team meet three times with the help from an outside facilitator. Two full days were spent studying our District's Strategic Plan and our school site data to develop our mission, objectives and tactics. From this work our Action Teams were formed and met to create plans to achieve the objectives and tactics set forth by the Planning Team. The 3rd day the Planning Team met to review the work of the Action Teams and to finalize our Strategic Plan which will guide the work we do as a school community for the next three years.

Data Analysis

Describe the use of data both during the 2 day planning meeting and action planning. Refer to research done during action planning.

Mission Avenue Open recognizes the need to analyze multiple data points for accurate accountability measurements when looking at our students success, therefore when creating our Strategic plan our teams considered the data from our API, AYP, District Benchmark Assessments, Student Running Records, Parent/Student/Teacher survey data, grade level assessments and classroom observational data.

Research that teams conducted around parent involvement and student success strongly suggests that students success hinges upon school to home communication, high leverage parent volunteerism, and concerted aligned efforts by parents and teachers in educating students. Research also suggests that these relationships must be founded upon open and respectful two way communication. One set of data related to this research that specifically guided the strategic planning team were results from our parent / student / teacher survey, which show varied results in years past and current years. In some survey areas there is a 12% discrepancy between parent / student and teacher perspectives on the same topics pertaining to student success and parent volunteerism in their education. in We strongly believe in parent involvement and recognize that building team capacity among parents, students and staff is one critical pillar to our success. This data showed that there was relevant need to look at how our parents / staff and students are aligned and working together. We will continue look at these results as one measure of our strides towards an aligned community that engages in respectful and high leverage conversations that encourage and promote student success.

Another point for consideration while building our action plans was the research about effective field education and experience in an open philosophy school. At Mission Avenue Open school our classroom data shows that students gain valuable knowledge when our field experiences are alligned to standards, classroom practice and encourage individual growth as an active, cooperative, and social process. Formative data obtained at the school site (through survey results, classroom assessments, parent and teacher input) and research on this topic show obstacles to and resources for this type of empowering education. This research and data in combination with our long standing philosophy for field education led us to our tactic which encompasses field experience.

Finally we looked at our summative CST data which is one measure that suggested a continued need for focus on professional learning with the CCSS. We discussed and researched much data odn found many data points of significance. Overall Mission Avenue Open school students preform very well on this standardized test yet we also recognize that within these data points lies an achievement gap. This gap is found between our white, hispanic and African American students where the differential between White students and African American students is 162 points and 38 points between our White and Hispanic students. An achievement gap also exists with students who are socioeconomically disadvantaged where the differential based upon growth API school-wide and socioeconomically disadvantaged students is 69 points. Our efforts through this action plan will focus on teaching the CCSS and closing our achievement gaps.

Parental Involvement

Resources available from family, school, district, and community to assist under-achieving students (ESEA)

Involvement of parents, community representatives, classroom teachers, other school personnel, and students in secondary schools, in the planning, implementation, and evaluation of ConApp programs (5 California Code of Regulations 3932)

Appropriate parental Involvement is critical to what we do at Mission Avenue Open School, and as a school of choice we have an expectation that each family will donate two hours per week towards the work we do both in and out of classrooms for our students. Currently we have an average of 85 parents sign in daily to volunteer in the classroom, supervise at recess and facilitate school-wide functions. Research shows that family engagement and involvement in the school results in increased success for achieving and under-achieving students. As a result of what we know and what the school community needs at Mission Avenue the Planning Team created a tactic within our Strategic Plan around parent involvement. We will continue to monitor, adjust and implement this tactic for the duration of our Strategic plan.

At Mission Avenue Open we have an active school site council, parent teacher association, and a fundraising team called the Mission Avenue Support team (MAST) consisting of parent and community partners. These groups all provide input in strategic plan development and the single plan for student achievement.

Description of Barriers and Related School Goals

Include the strongest themes from critical issues or Gap to Goal Review of Data

Through strategic planning the Mission Avenue Open strategic planning team identified areas for growth and critical issues that influence our continued success.

One of the areas for growth included teacher learning, understanding and implementation of Common Core State Standards. As a part of our reflection upon the CCSS needs at our site we also recognize a need to further engage in learning about student reading behaviors with both fictional and nonfictional text where an emphasis is placed upon nonfiction. We are acutely aware that our students will be held accountable for critical thinking and problem solving through assessments of multiple measures, which means that we as a site community must teach our children while employing teaching strategies that teach our students how to think critically. As a staff we must continue to engage in professional learning that will help us grow in these areas.

The team also recognizes the critical issues that are present with effective parent volunteerism. If we build strong relationships with our parent population with appropriate boundaries and mutual respect we will accomplish our goal of improved student achievement. The team identified that there is a spectrum for volunteerism in education and we questioned wether we were utilizing our parent volunteers in the most effective ways for improved student learning.

Lastly the team looked at our strong foundation of experiential learning. From this examination we learned that one of our critical issues involves our field experiences as a part of our experiential learning. We recognize that it will be important to re-examine the links between the CCSS and our experiential learning activities to assure the strongest leverage for learning. When experiential learning activities no longer allign with the CCSS those activities must be strategically abandoned or rethought. Compounding our thinking about Experiential learning was the monetary factor that families face. We recognize that we must allign ourselves with our community capacity to support field experiences and continue to be creative with and responsive to the economical needs that our families face. Our research shows us that there are both obstacles to and resources for this type of empowering education, our community and staff are committed to our continued experiential learning experiences and the rounded learning it provides our students.

- 1. API scores for subgroups reveals a negative growth pattern among all subgroups for the 2012-2013 school year.
- 2. Within these data points lies an achievement gap. This gap is found between our white, hispanic and African American students. Where the differential between White students and Hispanic students shows a gap og 90 points.
- 3. An achievement gap also exists with students who are disabled, socioeconomically disadvantaged or English learners. The differential based upon growth API school-wide and socioeconomically disadvantaged students is 98 points, for disabled students the gap is 124 points and our EL students show a 127 point gap.

- 1. Our English learner student population is relatively small, as a result this data set does not show the status of meeting AMAO targets.
- 2. The data above hi-lights our need and desire to engage in programs that provide high-quality professional development (such as Critical Literacy) to teachers, principals, and students. Our professional learning will be of sufficient intensity and duration to have a positive and lasting impact on the teacher's learning and students performance in the classroom.

- 1. The Local assessment data shows an overall decline in student proficiency in Math and Reading.
- 2. The Local assessment data shows an increase in absences in most groups and a decline in suspension rates for all groups.
- 3. This data is based on low parent and low staff responses. The data suggests that the majority of parents responded that the school and staff keep them well informed about their child's progress and about school and classroom activities. Areas that could use additional attention are the school actively seeking input from parents before making important decisions and collaboratively setting academic goals.

Planned Improvements in Student Performance

Planned Improvements: Goal/Tactic #1

The School Site Strategic Planning Team and Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet academic performance index (API) and adequate yearly progress growth (AYP) targets. As a result, it has adopted the following tactics, results statements, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

Focus: Experiential Learning

District Strategy:

Strategy 1: We will ensure all staff are implementing effective instructional strategies integrating technology and utilizing assessment data to actively engage each student to increase achievement on state standards 21st century skills and personal educational plans.

Tactic #1:

We will provide hands-on experiential learning opportunities to engage and inspire students, using constructivist strategies both in and beyond the classroom.

Data Used to Form this Tactic:

In forming this tactic we relied upon the research on effective field education and experience in an open philosophy school and classroom, and CST data. Formative data obtained at the school site through survey results, classroom assessments both formative and summative and parent / teacher input.

Findings from the Analysis of this Data:

The quest for student engagement must be conducted in the context of a comprehensive data system for measuring student learning. For this tactic we are focused upon rigorous and relevant learning beyond our classroom walls and beyond minimum requirements. Some indicators of this work include interdisciplinary work, arts integrated productions and projects, and learner outcome from all field experiences.

From our research we found that student engagement and inspiration comes when students are motivated and committed to learning, (2) have a sense of belonging and accomplishment, and (3) have relationships with adults, peers, and parents that support learning. Students need to be engaged before they can apply higher order, creative thinking skills. They learn most effectively when the teacher makes sense and meaning of the curriculum material being taught so that we can further challenge students to apply their skills to real world, unpredictable situations inside and outside of the school.Indicators include attendance rate and participation rates in extracurricular activities.

Related Objective and how it will be Measured:

All students will be able to demonstrate their learning in a creative, expressive, and confident manner as evidenced by multiple measures such as classroom assessments, focus group feedback; observational methods; interviews; study circles; and student, staff, and family surveys.

All students will develop and apply critical thinking and problem-solving skills

	Actions to be Taken to Reach This Tactic	Timeline	Person(s)		Proposed Ex	penditure(s)	
	(Results Statement)		Responsible	Description	Туре	Funding Source	Amount
1.1	Design and implement experiential learning strategies that actively involve all students in their education including opportunities for reflection and open ended collaboration in the classroom.	2015-16	Teachers, Support staff, Principal, Students and Parents / Guardians.	Create common agreements around experiential learning strategies by staff in alignment with Common Core. Communicate to parent community and elicit feedback to help inform final agreements. Review current and existing experiential learning strategies to determine alignment with shared agreements and to identify gaps or additional activities to expand on. Identify resources to support and acquire (to include, but not limited to; manipulatives, leveled books, movies, videos, music, technologyetc.) to be housed in a location on campus to function as a community resource center for staff and parents.

	(Results Statement)		Responsible	Description	Туре	Funding Source	Amount
1.2	Design and implement field experiences that actively engage students in contextualizing (or making meaning of) their classroom learning through exposure to challenges, opportunities for critical thinking and problem solving, and interactions with the environment.	2014-15	Teachers, Support staff, Principal, Students and Parents / Guardians.	Create common agreements and standard operating procedures around field experiences by staff in alignment with Common Core and open structured philosophy. Communicate to parent community and elicit feedback to help inform development of agreements. Create a Field Education Committee of teachers, parents and administration to review and discuss field experiences to ensure they are aligned to criteria based on common agreements Review current and existing field experiences to determine alignment with shared agreements and to identify gaps or additional activities to expand on			

Actions to be Taken to Reach This Tactic	Timeline	Person(s)		Proposed Expe	nditure(s)	
(Results Statement)		Responsible	Description	Туре	Funding Source	Amount
			Create a Learning Community including staff and parents to review resources necessary to support implementation of field experiences including: planning time, costs, additional training, and volunteer support, guided by common agreements Implement field experiences at each grade level that provide students with opportunities to explore their environment, think critically, and challenge themselves physically, mentally, and emotionally. Meet in grade level teams annually to review field experiences and communicate any modifications to staff and parents.			

Planned Improvements in Student Performance

Planned Improvements: Goal/Tactic #2

The School Site Strategic Planning Team and Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet academic performance index (API) and adequate yearly progress growth (AYP) targets. As a result, it has adopted the following tactics, results statements, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

Focus: Communication

District Strategy:

Strategy 3: We will ensure effective two-way communication that is honest transparent and timely to build trusting relationships and create a unified collaborative learning community.

Tactic #2:

We will build trusting relationships through identifying, modeling and integrating respectful collaboration in our community to ensure a healthy productive learning environment

Data Used to Form this Tactic:

The data the strategic planning team used to form this tactic consisted of interviews; observational data; student, staff, and family surveys and behavioral conduct data.

Findings from the Analysis of this Data:

Research that teams conducted around parent involvement and student success strongly suggests that students success hinges upon school to home communication, high leverage parent volunteerism, and concerted aligned efforts by parents and teachers in educating students. Research also suggests that these relationships must be founded upon open and respectful two way communication. One set of data related to this research that specifically guided the strategic planning team were results from our parent-student-teacher survey, which show varied results in trend data. In some survey areas there is a 12% discrepancy between parent-student-teacher perspectives on the same topics pertaining to student success and parent volunteerism in their education. Additionally and equally important in the formation of this tactic was staff and parent observations of respectful relationships between parents/guardians and teachers, formative and trend data was strongly considered in the formation of this tactic.

Related Objective and how it will be Measured:

All students, parents and staff will strive to consistently demonstrate Mission Avenue Open School's four behavorial standards to become respectful and responsible citizens in our school, community, and world. This will be measured by using focus group feedback; observational methods; classroom walkthroughs; peer reviews; teacher and student reflection; interviews; student, staff, and family surveys, data on student participation in classroom-school leadership opportunities and lastly student attendance and behavior data.

Planned Improvements in Student Performance

Planned Improvements: Goal/Tactic #3

The School Site Strategic Planning Team and Site Council has analyzed the academic performance of all student groups and has considered the effectiveness of key elements of the instructional program for students failing to meet academic performance index (API) and adequate yearly progress growth (AYP) targets. As a result, it has adopted the following tactics, results statements, related actions, and expenditures to raise the academic performance of students not yet meeting state standards:

Focus: Effective Instructional strategies, assessment and technology integration

District Strategy:

Strategy 1: We will ensure all staff are implementing effective instructional strategies integrating technology and utilizing assessment data to actively engage each student to increase achievement on state standards 21st century skills and personal educational plans.

Tactic #3:

We will ensure all staff are implementing effective, student centered, interdisciplinary instructional strategies integrating technology and using assessment data in keeping with our Open Structure Philosophy and aligned to Common Core State Standards (CCSS).

Data Used to Form this Tactic:

Data used to form this tactic included CST trend analysis and disaggregated data, API, parent survey data, and ongoing formative classroom assessments.

Findings from the Analysis of this Data:

While our overall API scores are high on state assessments, Mission Avenue Open school recognizes our decline in scores over the past year and looking ahead to the Common Core State Standards will require pushing our current practices further into critical thinking and problem solving. AYP goals were not met in 2012. In order to address these declines in achievement our instruction will need to be differentiated. Our decline in overall API and our recognition of achievement gaps were of significant conversation while developing this tactic.

Related Objective and how it will be Measured:

All students will develop and apply critical thinking and problem-solving skills.

By 2016 Mission Avenue Open School will close the achievement gap in Language Arts and Math by least 50% using multiple measures.

By 2016 through multiple measures we will increase the number of students in all groups who are proficient or advanced in English Language Arts and Math by at least 50%.

The annual measures of our progress in this area will be through State Standardized testing, while our ongoing measures of progress throughout the year will be through MAP (measures of academic progress) and TC Running Records both given three times within the 2012-13 school year. These assessments are in addition to regular ongoing classroom assessments.

School Site Council Membership

California Education Code describes the required composition of the School Site Council (SSC). The SSC shall be composed of the principal and representatives of: teachers selected by teachers at the school; other school personnel selected by other school personnel at the school; parents of pupils attending the school selected by such parents; and, in secondary schools, pupils selected by pupils attending the school. The current make-up of the SSC is as follows:

Name of Members	Principal	Classroom Teacher	Other School Staff	Parent or Community Member	Secondary Students
Dina Winston	[]	[]	[]	[X]	[]
Lisa Cannon-Wheeler	[]	[]	[]	[X]	[]
Brandi Richards	[]	[]	[]	[X]	[]
Kathleen Maloney	[]	[]	[]	[X]	[]
Nelly Otgon	[]	[]	[]	[X]	[]
Lorna Lindstrom	[]	[X]	[]	[]	[]
Dionne Collins	[]	[X]	[]	[]	[]
Nancy Carter	[]	[X]	[]	[]	[]
Melinda Livermore	[]	[X]	[]	[]	[]
Amberlee Townsend-Snider	[X]	[]	[]	[]	[]
Numbers of members of each category:	1	3	1	5	0

At elementary schools, the school site council must be constituted to ensure parity between (a) the principal, classroom teachers, and other school personnel, and (b) parents of students attending the school or other community members. Classroom teachers must comprise a majority of persons represented under section (a). At secondary schools there must be, in addition, equal numbers of parents or other community members selected by parents, and students. Members must be selected by their peer group.

Recommendations and Assurances

The school site council (SSC) recommends this school plan and proposed expenditures to the district governing board for approval and assures the board of the following:

- 1. The SSC is correctly constituted and was formed in accordance with district governing board policy and state law.
- 2. The SSC reviewed its responsibilities under state law and district governing board policies, including those board policies relating to material changes in the Single Plan for Student Achievement (SPSA) requiring board approval.
- The SSC sought and considered all recommendations from the following groups or committees before adopting this plan (Check those that apply):
 State Compensatory Education Advisory Committee
 English Learner Advisory Committee
- 4. The SSC reviewed the content requirements for school plans of programs included in this SPSA and believes all such content requirements have been met, including those found in district governing board policies and in the local educational agency plan.
- 5. This SPSA is based on a thorough analysis of student academic performance. The actions proposed herein form a sound, comprehensive, coordinated plan to reach stated school goals to improve student academic performance.
- 6. This SPSA was adopted by the SSC at a public meeting on .

Mission Avenue Open Elementary School's Parent Involvement Policy

At Mission Avenue Open School we are committed to the idea that parents are an integral part of the learning experience, both inside and outside the classroom. Learning is best accomplished when teachers, parents, and students work as a team. Hand in hand, as part of the team making academic choices, setting goals, and evaluating progress, students become responsible lifelong learners.

Volunteer hours at Mission are very important to the students, the teachers and the Mission community. We ask that each family donate two hours each week / child towards volunteering. The teachers at Mission appreciate the myriad of ways that families help them whether it's with homework grading, assembling art project packages, participating in field experiences, or working in the classroom. All volunteers must sign in to the school office and arrange (in advance) with the teacher the work that will be done.

Some teachers have a log book in their classrooms for parents and guardians to log in hours. Each form will captures one week of volunteer hours that should be logged as soon as possible.

If parents or family members are chaperoning on a field trip we require that they complete all volunteer paperwork in the office. Additionally, if they will be supervising a child other than your own we also require them to be fingerprinted. The San Juan Unified School District provides these services at NO cost. We encourage any parent planning to volunteer to complete the paperwork and fingerprinting early as the fingerprints can be unexpectedly delayed. If volunteers are needed for driving, parents will also need to complete the appropriate forms and have them on file in the front office at least 2 weeks prior to the field trip.

We are committed to the Open Philosophy because we know that it works and we believe it is whats best for our children. We welcome the participation of all families who embrace this philosophy, who recognize the remarkable, exciting, and distinguished learning community we've created at Mission Avenue Open School.
