What is the training for?

The California Assessment of Student Performance and Progress (CAASPP) adopted the Smarter Balanced framework of accessibility, which are the universal tools, designated supports and accommodations that have been developed for students taking the end-of-year test. This training will:

- Build your knowledge on the tools and supports that are allowable for CAASPP
- Teach you about the resources that are available for students with disabilities
- Help you to understand the resources that are available for English Language Learners
- Cover the restrictions of the embedded and non-embedded tools and supports

**Target Audience:** CAASPP Site Coordinators, Special Education teachers, ELIS and staff desiring to learn about the resources available to students on the CAASPP summative assessment
