**Media:** The media class is expected to deliver the announcements to the entire school every day during advisory. These announcements will be broadcast over Pasteur’s own closed circuit television. Because of this responsibility many positions are required to make the media class run smoothly. These positions include; anchors, reporters, camera persons, artists, editors, and various jobs related to the production of the announcements.

Yearbook - Students will be taking pictures, working on creative layouts, and advertising. A select group of 5-7 students will be working on the yearbook.

**Student Government:** Students in the class have an important leadership role at Pasteur. The students in this class plan most of the student activities on campus as well as charitable events. The Student government class also facilitates a new student program for students who start school mid-year. They also maintain all of our school bulletin boards and decorate for dances. Students who apply must be able to stay after school on some days.

**Computer Applications:** is one of 3 classes offered in the Pasteur "Elective Wheel." Students are exposed to a variety of software products using Apple Imac computers. The class will help prepare students to succeed in other curricular courses, high school and the work place. The course follows the district guidelines for computer competency and standards. Students learn in a "hands on" environment while having fun!
Applications covered in this course include:
* Keyboarding, Word Processing, Spread sheet
* Graphics and Video, Exposure to HTML, Instructional Games
* Career Futures, 3d Modeling, Garage Band, Presentations

**Art:** is an introductory course that exposes students to various artists and their styles of art. Students will learn through drawing, painting, sculpture, and media projects. (We will potentially culminate the semester with a field trip to Crocker Art Museum.----don't know if you want to add this but I'm planning on it next year)

**Woodshop:** Wood Shop is an introductory class that teaches students the proper and safe use of machines and tools. The students will produce a variety of projects using tools and skills practiced in our shop tutorials. They will learn to produce projects that will reflect pride in the finished product.

**Computer Applications:** Students are exposed to a variety of software products using Apple Imac computers. The class will help prepare students to succeed in other curricular courses, high school and the work place. The course follows the district guidelines for computer competency and standards. Students learn in a "hands on" environment while having fun!
Applications covered in this course include: Keyboarding, Word Processing, Spreadsheet, Graphics and Video, Exposure to HTML, Instructional Games, Career Futures, 3d Modeling and Garage Band

**Band and Choir:** Students will study music theory and performance standards. Spring and summer concerts are planned. Our choir and band take part in the annual San Juan Sings program each spring.

**Teacher/office Assistants:** Students work with teachers in their classrooms or in the office to support the running of the classroom and school. Jobs might include filing, copying, assembling work projects, delivering passes and other tasks.
