**USADA DSRYAL SUPPLEMENT WARNING**

Many dietary supplements (vitamins, minerals, amino acids, homeopathics, herbs, and energy drinks), which are sold over the counter or through the Internet, contain substances that are prohibited by the World Anti-Doping Code. Since anti-doping rules make the presence of a prohibited substance in an athlete's urine a doping offense regardless of how the substance got there, any athlete who takes a dietary supplement does so at his or her own risk of a positive test and a doping violation.
