

## Enrichment Curriculum 2018-2019

**Today Counts/Character Counts!:** This book is designed to help begin each day of the program with a meaningful activity, mini-lesson, or discussion that focuses the students' attention on The Six Pillars of Character: Trustworthiness, Respect, Responsibility, Fairness, Caring, and Citizenship.

**Drawing Lab for Mixed-Media Artists:** This book is designed to make drawing a pleasurable experience for students. Mark-making is one of our first pleasures as children. Having a foundation of basic drawing skills will help in all creative work.

**Team Challenges:** This book offers ways to share the concept of creative problem solving with children. Through simple, hands-on activities, students can experiment with building methods, discover new uses for everyday items, try on new personas, and learn to express some unusual ideas as they work toward solving a problem as a team. These activities help to build cooperation, communication, and creativity.

### Homework Policy

Discovery Club will provide a minimum of 30 minutes of homework time daily. Staff will provide a quiet environment and assist children as the number of children permits. Children may choose to work on homework, silent reading, journaling, or simply rest during this quiet period. Discovery Club does not guarantee that all assigned homework will be completed, that all homework will be correct, or that children will understand all concepts in their assignments.
